

# Please Wait

## Stroke 9

Let's just say for the moment that I said to be quiet  
when I know I'll be hoping that my wrongs will be right  
lets just say, lets just say  
I'm sorry, lets just be, let's just be  
well, please wait for me I can't even tell you how much i need to see you, see you again  
please do your part to be kind  
'cause you know its my heart milking my mind  
you would leave and i would stay  
it's not like me to be this way please wait for me  
i can't even tell you how much i need to see you, see you again  
just wait for me  
i can't even tell you how much i need to see you, see you again  
my heart is breaking  
my heart is shaking  
its breaking  
please, wait for me  
i can't even tell you how much i need to see you again
