Champagne

October Drift

All the time is all I need
I don't need these clothes that hang from me
All the time is all I need
I don't need these ropes they're all I see

I've got views from every side
Streetlights shine like candles but never mind
I've got views from every side
I can't remember what I'm trying to find

Every time we pass this way
it makes me wonder what you're up to
Every time we break away
Another day we then go back to

Every time we pass this way
it makes me wonder what you're up to
Every time we break away
Another day we then go back to

I drove further than I meant to
Didn't mean to drive into the blue
I drove further than I meant to
I forgot that you could drive right through

Every time we pass this way
it makes me wonder what you're up to
Every time we break away
Another day we then go back to

Every time we pass this way
it makes me wonder what you're up to
Every time we break away
Another day we then go back to

Used to put champagne in my veins
I need you to (???) now

x4
