I Have Been Around the World

Dar Williams

Well you make my coffee, and its only 3am, but soon Im going on my way
And my time is almost up, I hold my coffee cup, we sit with nothing left to say
And I know that soon I will be touching down
In a shining city or a mountain town
I have been around the world, but all that I can see
Are these moments that we have, youre all the world to me
Well theres always laughter, and the parties after, and the fond farewell will before I go
Leaving town, the window panes they flash like movie frames, the last scene in a picture show
But I know that I am not alone and you are the one that I can tell my stories to
I have been around the world, theres so much there to see
And the story never ends youre all the world to me
Then I know there are times you think Ive lost my way, but there is no way this can be true
Cause when Im walking through, the door I look for you, youre all Im looking for
And its truer now then its ever been and the lucky one that love has taken in
I have been around the world from sea to shining sea,
I wish that you were here. Youre all the world to me
I have been around the world from sea to shining sea
And now Im heading home, youre all the world to me
