

# I Have Been Around the World

## Dar Williams

Well you make my coffee, and its only 3am, but soon Im going on my way  
And my time is almost up, I hold my coffee cup, we sit with nothing left to say  
And I know that soon I will be touching down  
In a shining city or a mountain town  
I have been around the world, but all that I can see  
Are these moments that we have, youre all the world to me  
Well theres always laughter, and the parties after, and the fond farewell will before I go  
Leaving town, the window panes they flash like movie frames, the last scene in a picture show  
But I know that I am not alone and you are the one that I can tell my stories to  
I have been around the world, theres so much there to see  
And the story never ends youre all the world to me  
Then I know there are times you think Ive lost my way, but there is no way this can be true  
Cause when Im walking through, the door I look for you, youre all Im looking for  
And its truer now then its ever been and the lucky one that love has taken in  
I have been around the world from sea to shining sea,  
I wish that you were here. Youre all the world to me  
I have been around the world from sea to shining sea  
And now Im heading home, youre all the world to me
