Someone That You're With

Nickelback

I reside in 209, you're in 208
You moved in last Friday night, and I just couldn't wait
So I tried to call across the hall, to ask you out someday
But a lineup formed outside your door, and I was way too late
Well, I'd rather start off slow
This whole thing's like some sort of race
Instead of winning what I want
I'm sitting here in second place
Because somewhere the one I wanna be with's, with somebody else
Oh God, I wanna be that someone that you're with
I wanna be that someone that you're with
And I can talk about it all day long 'til I run out of breath
But I still wanna be that someone that you're with
I've got to be that someone that you're with
And I'm pacing by the phone
'Cause I hate to be alone
And if you're out there with him somewhere and just about to kiss
God I wanna be that someone that you're with
Well, I hear your favorite songs you sing along with everyday
And I borrow things that I don't need for conversation sake
Last night I heard your key, it hit your lock at 4 AM
Instead of being out with me you must be out with them
Well, I'd rather start off slow
This whole thing's like some sort of race
Instead of winning what I want
I'm sitting here in second place
Because somewhere the one I wanna be with's, with somebody else
Oh God, I wanna be that someone that you're with
I wanna be that someone that you're with
And I can talk about it all day long 'til I run out of breath
But I still wanna be that someone that you're with
I've got to be that someone that you're with
And I'm pacing by the phone
'Cause I hate to be alone
And if you're out there with him somewhere and just about to kiss
God, I wanna be that someone that you're with
Well, somewhere the one I wanna be with's, with somebody else
Oh God, I wanna be that someone that you're with
And I can talk about it all day long 'til I run out of breath

But I still wanna be that someone that you're with
I've got to be that someone that you're with
And I'm pacing by the phone
'Cause I hate to be alone
And if you're out there with him somewhere and just about to kiss
God, I've got to be that someone that
I wanna be that someone that
I've got to be that someone that you're with
