

Gaining ground

ATM Addicted to Machines

It's good to see we're gaining ground
And our time has come
Now I see what's around
I think we may have won
So many changes, all the new faces
The future looks so bright
It's good to see we're going places
Looking back, I know we were right I can just feel the energy
flowing through our veins
There is always strength in unity
it will never be the same
All of us made a choice
It's time to show our pride
now's the time to hear our voice
And not keep it bottled inside
