

Curtains

Bailiff

Open up the window let the wind blow in, let the wind blow in.
Open up the window let the wind blow in, let the wind blow in.

Time tick-tocks everyday stops when the sun drops.

Open up your mouth let the truth come out, let the truth come out.
You're carrying the very thing you live without.

Open up your eyes, the world arrives, the world arrives.
You're hearing the sounds that you've been thinking out loud.

Open up the window, you can hear the wind blow.
Tell me where you been so, tell me where you been so long

Open up the window, you can hear the wind blow.
Tell me where we went so, tell me where we went so wrong.

Open up your hand help me understand, help me understand.
Why life commands surprise demands on rising lands.

Open up your eyes, the world arrives, the world arrives.
You're hearing the sounds that you've been thinking out loud.
