

Tu Puedes Salvarme

Luis Fonsi

My whole life I never had love come true
But then you came a long, long way
You came and rescued me
You showed my heart
Things it's never ever seen and now I believe Only you can save me
'Cause I'm falling now
I was lost till I found you
Only you can hear me
When I'm crying out My whole world depends on you
Heaven must be missing an angel
'Cause you're right here with me
Oh baby, can't you see my life's complete
And that's why I believe
That only you can save me Love's so sweet
And that's all that you're giving to me
I don't want to search no more
You're all that I adore
You and me made love
Like it was meant to be and now I believe Only you can save me
'Cause I'm falling now
I was lost till I found you
Only you can hear me
When I'm crying out My whole world depends on you
Heaven must be missing an angel
'Cause you're right here with me
Oh baby, can't you see my life's complete
And that's why I believe
That only you can save me I know that you'll see
There's just no other place
That I would ever wanna be
As long as your right here next to me And angel, you know, we should be here
Making precious memories for an eternity
And you should've know
That nothing else matters
To me without you so save me
