Rescue Me (feat. Juliana Chahayed)

Dekku

I can be the one to carry you into the light
That makes a path for us
I can feel your breath
As we walk through the emptiness
It gathers all around

I can take it all away from you, right now
And leave this darkened world
But if you had the choice to save
The one you've loved
Would you ever rescue me?

I can be the one to free you from your pain
Erase these broken lies
I promise I would bury all the fury from your mind
We'll leave it all behind

I can take it all away from you right now
And leave this darkened world
But if you had the choice to save the one you've loved
Would you ever rescue me?
