

Moonlight Daydream

Echo Orbiter

I'm not insane; Maybe I'm on another planet
What is madness. In this world surrounding me that I've created

Who of you has your eyes closed?

Pixie stardust and muzzled moonlight
A moment in life that's right
All of June summer, sweet dreams smiley ghost dawn dew

No one's here now, in this place where the sun is shining only on me
But in the distance shadows, she awaits to join me for a lovely evening

Who of you know you're missed?

Pixie stardust on a moonlight daydream
The fire in the sky is blue
Blooming yellow pedals feed the fish who live beneath the trees
