

My Imagination

Jimmy Johnson

when you appeared in my imagination
i had no idea that you would ever be real
 now you're my life
 not just some fascination
and i love you now that you're real
 now that you're real
 not my imagination
someone to love and i do love you dear
long before love you were here in my memories
 and i love you now that you're here
 and now my dream talks to me
 and fixes my coffee in the morning
rubs my back when i'm weary, thank you dear
 i love you now that you're here
