

Timebomb

Streamline

(verse)

Taking the long way home
Maybe I'll take your road
Never been here alone
I know you're alive but you might as well die to me
You think you know
(You carry a fuse)
About to explode
(Never thought so soon)

(chorus)

You're like a time bomb igniting while I'm gone
You're like a time bomb
It was a matter of time before you're gone

(verse)

You said that you cared too much
That you need to be more selfish
You're an all or nothing kind of girl
And between me and nothing your choice left me gasping for air
You think you know
(You carry a fuse)
About to explode
(Never thought so soon)

(chorus)

You're like a time bomb igniting while I'm gone
You're like a time bomb
It was a matter of time before you're gone

(bridge)

Time bomb
Did I set you off?
Time bomb
Have I set you off?
If you can just run away like you did
This couldn't be love I don't care it's all lies
This fantasy feeling that you constructed

Take it all with you because none of it's mine

(chorus)

You're like a time bomb igniting while I'm gone

You're like a time bomb

It was a matter of time before you're gone

You're like a time bomb

It was a matter of time before you're gone

Have I set you off?
