

Too Young to Fight It

Young Love

Take a dare, don't tell the truth, keep this between me and you
Whispers become loud, when word of this gets out
Will the message cause a motion, we won't know till we get there
When the sun's down, light's come up, friends and enemies come together
Summer nights hitting, it's so hard
we're blistering
Can't keep from moving, the season is rising
We're too young to fight it, we stand united
Summer nights hitting, it so hard we're blistering
Can't stop to sleep it off, sleep it off
Hearts are beating to the sound, kids are living underground
Rumors get so loud, we want to scream and shout
It's taking over now, you can't control it
You're shaking, soaking wet in the middle of the night again
Will the message cause a motion, we won't know
till we get there
When the sun's down, lights come up, friends and enemies come together
Summer nights hitting, it's so hard
we're blistering
Can't keep from moving, the season is rising
We're too young to fight it, we stand united
Summer nights hitting, it so hard we're blistering
Can't stop to sleep it off, can't stop to sleep it off
Will the message cause a motion, we won't know till we get
there
When the sun's down, lights come up, friends and enemies come together
Summer nights hitting, it's so hard
we're blistering
Can't keep from moving, the season is rising
We're too young to fight it, we stand united
Summer nights hitting, it so hard we're blistering
Can't stop to sleep it off
Summer nights hitting, it's so hard we're blistering
Can't keep from moving, the season is rising
We're too young to fight it, we stand united
