

# Take You There

## H.E.R.

Where'd you go?  
Who you know?  
How I've been living without you  
Daydreaming, on a car with you, like who's rising  
With you tonight ends on a island, yeah It's about time we're making up  
The times you wasn't with me waking up  
Lying if I said I didn't miss your touch  
I needed to, I needed to  
Needed to distance myself from you  
All just to know you are the truth  
So come close I want you, want you  
Can I tell you something for what it's worth?  
With you Heaven is a place on Earth  
And I will take you there, I'll take you  
I'll show you something, give you more than words  
With you Heaven is a place on Earth  
And I will take you there, I'll take you there  
Take you there Fill me up, till my cup's overflowing  
I'm so anxious just to feel the silence  
It's so quiet, but I hear you  
Saying to me baby It's about time we're making up  
The times you wasn't with me waking up  
Lying if I said I didn't miss your touch  
I needed to, I needed to  
Needed to distance myself from you  
All just to know you are the truth  
So come close I want you, want you  
Can I tell you something for what it's worth?  
With you Heaven is a place on Earth  
And I will take you there, I'll take you  
I'll show you something, give you more than words  
With you Heaven is a place on Earth  
And I will take you there, I'll take you there, yeah  
Take you there Give it, please me, don't tease me  
Love me, give me that feeling  
I want you to give it to me, yeah, yeah Give it, please me, don't tease me  
Love me, give me that feeling  
I want you to give it to me, yeah, yeah Yeah, woah  
Take me high, high
