

# Nothing For Granted

[Brendan James](#)

Leave you worries, leave your fears, leave the doubt you're holding dear  
Leave them there love, by the door, they're no good anymore  
Tell your friends you'll see them later, tell your family they can wait  
You're only young once and only dream of the day that love will steal you away  
Run away with me down these  
midnight streets, we will take  
Nothing for granted, Nothing for granted  
Come away with me life is short and sweet, we will take  
Nothing for granted, nothing for granted  
Stop the seasons drifting by, stop believing they're no time  
Stop your heart from closing off, I think you deserve it all  
Love your future, love your past, love your body it's all you have  
Love your secrets bottled up, but love them more when you give them up  
Run away with me down these  
midnight streets, we will take  
Nothing for granted, Nothing for granted  
Come away with me life is short and sweet, we will take  
Nothing for granted, nothing for granted  
You gotta get outta your mind, there's many wonders to find  
There's so many words they could write across your early grave  
So come on and open your eyes, I will be right by your side  
And we will see love lies in everything  
Run away with me down these midnight streets, we will take  
Nothing for granted, nothing for granted  
Nothing for granted, nothing for granted  
Come away with me life is short and sweet, oh  
Nothing for granted, nothing for granted
