Time Ago

Black Lab

I watch your window for hours
The moon has set down without us
All by ourselves riding in the front seat
Watch the sun come up
All by ourselves we would runRemember it was so long ago
Remember, baby, it was a long time agoFeel your hand close beside me
Hear the highway behind me
All by ourselves we made love
Under the sleeping moonless night
All by ourselves we would runRemember it was so long ago
Remember, baby, it was a long time agoI couldn't stop you crying
Or stop myself from fighting back
I tried but never hard enough
Don't you remember, love?
So you remember, love?
Yeah nowAll by myself I can see it
Like it's right before my eyes
All by myself time goes byRemember it was so long ago
Remember, baby, it was a long time ago
Remember, baby, it was so long ago
It was so long ago, remember, baby
Do you, do you remember, baby?
Do you, do you remember, baby?
