Enough Said

George Canyon

I'm not one to just open up my mind
I'd rather let somebody else do the talkin' most of the time
I don't have much to say
But how many words does it take
I love you and I want to
With every single breath - enough saidI won't try to be someone that I'm not
But I know a woman likes to hear sweet nothing things a lot
So I'll do the best I can
I'll keep sayin' this over and over again
I love you and I want to
With every single breath - enough saidDon't ever think that I don't
I love you and I want to
With every single breath
I love you and I want to
With every single breath
Enough said
