

# Waterworld

## Handsome Boy Modeling School

For those that know me  
For those that know me  
For those that know me

For those that know me, indeed I like to flowAuthentically raw wit it, see I augmented this industry

To submit to my will, all attempts to limit me

Can kneel, peel caps wit ill raps

Nothing convenes here till your camp gets smeared like papWhat you tryin' to tell me, skills never found me

Workin' for peanuts amongst jelly MC's, really ain't my steez

Peep game, I plot on different ways to make these styles

Ricochet through main framesThe day-to-day theme is turn these fake teams gangrene

My main vein's the only thing about me mainstream

You doubt me like the foes of Noah, embarkin' in this Ark

The soul controller, while fools caught up in this Del used to blow upYou're inundating wit the out-dated

See all of y'all fall when this cascade hits

Yo D, watch these watered-down clowns get drowned

And lounge sound broken down in Cuba tryin' to build ships off shit they bitI spit that major play saliva

Taylor-made for cypher sole survivor

Pay the piper if you plan to go inside my covenant

Better come in two's, matta fact come a crew to get you backExecutives, we wet you wit the hymns that leave  
you and your man

Packin', attackin' wit verbal cataclysms

Leavin' the average rapper drenched and grab a trench

Guard against my El Nino lingo

A labyrinth of keen flows, concealed within the singleThis is Waterworld

For those that know me, indeed I like to flow

Waterworld

For those that know me, indeed I like to flowThis is Waterworld

For those that know me, indeed I like to flow

Waterworld

For those that know meMy scripts consist of H20, hip hop and oxygen

I flip commission doctrines that make me Shake-Speare's pier

Upon this here tear I fear not

Killin' furious wit the superior onslaughtOn top of this isle solo, like Gilligan wit a million styles

To throw yo' way wit capital A

We make waves, causin' tsunamis to your armies

Splashin' like the cracken on clash of the Titans, writin' calmlyCall me Aquarius, each full page a new age

I'm on a crusade to ranter your parade

See 'Core is more than three-quarters of what this rap world secure

So this is Chinese water torture for MC's to endureAs I restore this reservoir wit my repertoire of metaphors

Step into the 'Core, better have your life insured  
For supernatural disasters, I'm quick to cast a flame  
To your astral plane, it's bitch-made, get played like CanastaWaterworld  
For those that know me, indeed I like to flow  
This is Waterworld  
For those that know me, indeed I like to flowWaterworld  
For those that know me, indeed I like to flow  
This is Waterworld  
For those that know meWhat's an MC without concepts  
I speak easy comin' to offset your plumbing  
Like leaky faucets, runnin' my dungeon wit aquatic contraptions  
The fifth fold's a fish bowl, kick hard as contractions  
Wit skitzo-memos closed-captionedYour lip's sewed 'cuz hardest to your fraction try to test me  
You wouldn't tip-toe through Moses parted Red Sea, it's bound to collapse  
So now what makes you think the sound of these raps  
Is something different, I'm even pitchin' the kitchen sink wit comin' with itLiquefied rhymes rhyme wax  
It's time for jack-fakers to vacate, they take up space  
Like the Great Lakes, makin' a great case for me to hate  
Paint a picture clear as Evian, raps on tap like Savior GloverUndercover, peeps wonder, why he became the  
architect 'cuz none love us  
We spark the shit that makes the blood cometh  
Wash away your blockade plus your brigade  
Tryin' to sandbag clever words togetherThe weather, the storm, porn's poured on cassette wit architect sweat  
In the cores of us form when he pass Tech-12's  
I delve deep in this abyss, inspect hell  
Tell a fallen angel to eat a dick if he gets pissed 'cuzThis is Waterworld  
For those that know me, indeed I like to flow  
Waterworld  
For those that know me, indeed I like to flowThis is Waterworld  
For those that know me, indeed I like to flow  
Waterworld  
For those that know me, indeed I like to flowFlow  
Flow  
Flow  
...
