

Feel It All Around

Washed Out

You feel it all around yourself
You know it's yours and no one else
You feel the thought of learning again
It's all around
You're tired of all the things you did
You'll work it out

You feel it all around yourself
You know it's yours and no one else
You feel the thought of learning again
It's all around
You're tired of all the things you did
You'll work it out
