

We Dance To A Different Disco, Honey

Short Stack

We dance alone tonight because
We dance to a different disco, honey! Honey, forgive me for I have sinned
And I don't believe in you so
We'll murder this dancefloor, because were all done for
We dance to a different disco And I lie awake at night
Just hoping to make you shiver
I'll be your disaster forever and after
So cry me a fucking river And I'll be just fine
I bet you say that to all the boys We dance alone tonight because
We dance to a different disco, honey!
And we'll na-na-na-na never fall in love
We dance to a different disco, honey! Honey, I'll shoot down the moon for you
I love every word you've spoken
I know that you'll miss me
So shut up and kiss me
Living la vida loca And I'll be just fine
I bet you say that to all the boys
Is this what you have been waiting for! We dance alone tonight because
We dance to a different disco, honey!
And we'll na-na-na-na never fall in love
We dance to a different disco, honey! Our lips collided with such force
We dance to a different disco, honey!
And we'll na-na-na-na never fall in love
We dance to a different disco, honey! We dance to a different disco
We dance to a different disco, honey! Boom And we never said we'd slit, slit, slit. No!
We'll be working for that kiss, kiss, kiss. Home!
And I never said I'd miss, miss, miss. You!
And we'll be dancing to a different disco, honey! We dance alone tonight because
We dance to a different disco, honey!
And we'll na-na-na-na never fall in love
We dance to a different disco, honey! We dance alone tonight because
We dance to a different disco, honey!
And we'll na-na-na-na never fall in love
We dance to a different disco, honey! We dance to a different disco!
We dance to a different disco, oh!
We dance to a different disco!
We dance to a different disco, honey!
