

# Fire in the Sky

## Saxon

There's a fire in the sky  
There's a feeling in the air  
When the ground starts to tremble  
The first attack is here You won't stand a chance  
When the missiles start to fly  
They never tell the people  
Till the holocaust is here When the fire's in the sky  
You'll be running for your lives  
When the fire's in the sky  
Prepare yourselves to die Where, where are the shelters?  
They said, they would be there  
You'll need, need some protection  
From the radiation flare Don't, don't start a panic  
It won't do you no good  
You'll just have to wait  
For the end of all mankind If you're near the point of impact  
There's nowhere you can run  
If the heatwave don't get you  
The shock wave surely will There won't be no more heroes  
There's no one left to fight  
It's the end of our planet  
We've committed genocide When the fire's in the sky  
You'll be running for your lives  
When the fire's in the sky  
Prepare yourselves to die When the fire's in the sky  
You'll be running for your lives  
When the fire's in the sky  
Prepare yourselves to die  
To die, to die, to die, to die
