

Satisfied

Crystal Lewis

sitting in traffic too long
listening to my favorite song
watching all the cars go by
my mind wanders and wonders why i can't drive a car like that
i can't have a little more cash
for a bigger house with much more room
for more leather jackets, hats, and dresses,
high-heel shoes i bring myself back to reality
what was i thinking, i have everything i need
i don't want for anything at all...
i'm satisfied satisfied [love your life]
satisfied [laugh a lot]
satisfied [be content]
satisfied [with what you've got] i've been given sweet salvation
forgiveness came and rescued me
i am wrapped up in redemption
i was guilty - now i'm free i think about the air i breathe
i think about the song i sing
i think of friends and family
i think what i've got i like a lot it's all i need don't let this world trick you in to thinking
you need what it's got to be happy
satisfaction comes from something
this world cannot provide...
be satisfied! everything we really need
from now until eternity
God already knows we need it
God already knows we need it stop your eyes from darting here and there
trust your desires to His care
His promises are true...!
