

Game of Love

Jim Capaldi

She told you slowly
She loved you only
And you believed her but now you're lonely
Welcome my friend to the game of love First she loves you
Then she leaves you
Thinking what I've gotta do to please her
Welcome my friend to the game of love There was a time love was new
It took the grey skies and made them blue
But that same love was turned around
And left you cold Now all that's left of the years
that you wasted with your tears
How does it feel now that love
has passed you by Now you're walking through the city
of them bright lights that seem such a pity
Welcome my friend to the game of love There was a time love was new
It took the grey skies and made them blue
But that same love was turned around
And left you cold Now all that's left of the years
that you wasted with your tears
How does it feel now that love
has passed you by Tears and breathless
Pain and sorrow
There's so much sadness
you can't face tomorrow Welcome my friend to the game of love
Welcome my friend to the game of love
Welcome my friend to the game of love
Welcome my friend to the game of love
Welcome my friend to the game of love
Welcome my friend to the game of love
