

# Race Babbling

## Stevie Wonder

This world is moving much too fast  
They're race babbling  
This world is moving much too fast  
The ends unraveling  
Man's production  
Life's corruption  
World destruct  
Help me, people  
Save you, people  
God's induction  
Life's construction  
These instruct  
Will save every living thing  
Can't you see that  
Life's connected  
You need us to live  
But we don't need you  
This world is moving much too fast  
They're race babbling  
This world is moving much too fast  
They're race babbling  
This world is moving much too fast  
The end's unraveling  
You need us to live  
But we don't need you  
This world is moving much too fast  
You can't conceive the nucleus of all  
Begins inside a tiny seed  
And what you see is insignificant  
[Incomprehensible]  
Man's production  
Life's corruption  
World destruct  
Help me, people  
Save you, people  
God's induction  
Life's construction  
These instruct  
Will save every living thing  
Can't you see that  
Life's connected  
You need us to live  
But we don't need you  
This world is moving much too fast  
This world is moving much too fast  
They're race babbling  
This world is moving much too fast  
They're space traveling  
This world is moving much too fast  
They're race babbling  
This world is moving much too fast  
The end's unraveling  
This world is moving much too fast

This world is moving much too fast

They're race babbling

This world is moving much too fast

They're space traveling
