Don't Unplug Me

All Caps

Don't unplug me or just shut me down
Please just love me with your steel heart
I'd reboot you if you'd look at me
With those cold eyes one more timeI remember our software was compatible
I think I felt my circuit board ignite
You held my hand in your metallic grip
We may be machines, but I'm in love tonightBaby, there's something I have to say
I think it's time for my upgrade
I would look so good in version two
But I promise it's me, not youDon't unplug me or, or, or just shut me down
Please just love me with, with your steel heart
I'd reboot you if, if you'd look at me
With those cold eyes one, one more timeCan you hear me, you haven't moved an inch
Is there system failure, what should I do
Your new interface, it seems to have some bugs
You're not responding, I think they broke youHello, and welcome to version two
Tell me what can I do for you
What is a hug, that does not compute
Please stand by for my system rebootDon't unplug me or, or, or just shut me down
Please just love me with, with your steel heart
I'd reboot you if, if you'd look at me
With those cold eyes one, one more timeI just got the memo about this upgrade to version two
It removes extraneous programs
That means emotions like loving you
I don't want to lose myself or ever say goodbye
I wanna hold on to my consciousness
I don't wanna dieI remember our software was compatible
I think I felt my circuit board ignite
You held my hand in your metallic grip
We may be machines, but I'm in love tonightDon't unplug me or, or, or just shut me down
Please, please love me with, with your steel heart
I'd reboot you if, if you'd look at me
With those cold eyes one, one more timeDon't unplug me or, or, or just shut me down
Please just love me with, with your steel heart
I'd reboot you if, if you'd look at me
With those cold eyes one, one more time
One more time
