

The Future (Generic People Edit)

Prince

"I'm not gonna kill you. I want you to do me a favor,
I want you to tell all your friends about me."
"What are you?"
"I'm Batman!" I've seen the future and it will be
I've seen the future and it works
And if there's life after, we will see
So I can't go like a jerk Systematic overthrow of the underclass
Hollywood conjures images of the past
New world needs spiritually
That will last
I've seen the future and it will be I've seen the future and it will be
I've seen the future and it works
And if there's life after, we will see
So I can't go like a jerk Yellow Smiley offers me X
Like he's drinking seven up
I would rather drink 6 razor blades
Razor blades from a paper cup
He can't understand, I say to tough
It's just that I've seen the future
And boy it's rough I've seen the future and it will be
I've seen the future and it works
And if there's life after, we will see
So you can't go like a jerk
No, no I've seen the future and it will be
Wait a minute Pretty pony standing on the avenue
Flashin' a loaded pistol, to dumb to be true
Somebody told him playin' cops and robbers was cool
Would our rap have been different if we only knew? I've seen the future and it will be
I've seen the future and it works
If there's life after, we will see
Don't go out like a jerk Systematic overthrow of the underclass
Hollywood conjures images of the past
New world needs spiritually
That will last
I've seen the future and it will be [Repeat: x6] "Think about the future"
