

Chertograd

Deathstars

10.000 needles of light
Pin the drugs of last night
Kill the cigarette, now sleep
Let the wolves upon the sheep The wings of the world move slow in this hall
And the hunger of hope it starts to starve God, God, oh God of Chertograd
Lick the sounds that bleed from his mouth
God of Chertograd
Rip the heavens with the horns of the south How strong the weakness is
Exhale you fail to resist
Shut the blinds, and rewind
Let the ghost into your mind The wings of the world move slow in this hall
And the hunger of hope it starts to starve God, God, oh God of Chertograd
Lick the sounds that bleed from his mouth
God of Chertograd
Rip the heavens with the horns of the south
