

The Cure and the Cause (Dennis Ferrer Mix)

Fish Go Deep

You give sweet and how easily I fall deep
Your touch pours like honey on my skin
It's smooth but it lingers
(Too long) You the cure and the cause of my blues
My only flaw, your sea, it can be freezing
I thought I'd float I sink deeper blue, by you I'm consumed
Oh, I'm such a fool thinking I won't get caught
In your downhill flow
Got swept away, but what good is a beautiful day, I'm alone You, the cure and the cause of my blues
My only flaw, you keep needing
You keep calling even from
(Behind)
A shut door When you step from view I can still see you
Your shadow tells me more
Don't take your love away Just a few things before I head on my way
I think you're wonderful and good when you want to be
You are what I want but not what I need And you are no good for me
Because you and the cure
And you are the cause of my blues
Cure me, come cure me, please cure me Don't take your love away
