

# The War I Survived

## Hawkwind

Death comes like a [unknown] in the midst of all wars  
Reason and logic, the generals cry "more"  
Bodies in gullies, contortionate poses  
Caught by the same time, as the guns and roses  
Take me back to the war I survived  
I can't live no more, this is slaughterhouse five  
Take me back to the war I survived  
I can't live no more, this is slaughterhouse five  
Nice business guns, bombs to the haloed Moon  
Trust this landscape to the barren gloom  
A bulletproof Bible can protect your heart  
It'll cover your eyes when you're falling apart  
Take me back to the war I survived  
I can't live no more, this is slaughterhouse five  
Take me back to the war I survived  
I can't live no more, this is slaughterhouse five  
[unknown] rise higher for the martyrs ?????  
[unknown] freedom for unprovoked attack  
Get in there and use them, the shatter????? bomb  
Armies create circles, sparks for the dawn  
Take me back to the war I survived  
I can't live no more, this is slaughterhouse five  
Take me back to the war I survived  
I can't live no more, this is slaughterhouse five  
There's only bombs, nobody's left alive  
Take me back to the war I survived  
These were people like you and I  
Take me back to the war I survived
