

# Into the Light (feat. Wild Cub)

## J.Views

I was lost and wandering  
I couldn't see your face  
That tangled branch inside me  
Grew and grew to a deeper place

And I couldn't say  
Or wash it away  
The things that I had hid inside  
I tried and tried  
You stood there  
In the night air  
A flicker in the fading lights

You lift the veil from my eyes  
Are open  
Open wide  
We're strangers in the dark tonight  
Blind hope (and)  
We don't ask why  
From the dark into the light

I stood there naked I felt  
New in front of your heart  
Made clean by your raw fire I  
Took the darkness and tore it apart  
I can't go  
I won't hide  
I need to hear you say that  
Something's shone  
In the light

Look me in my eyes  
Are open  
Open wide  
We're strangers in the dark tonight  
Blind hope (and)  
We don't ask why  
From the dark into the light

I can't go

I won't hide  
I need to hear you say that  
It's all you want  
So look me in my eyes

My eyes  
Are open  
Open wide  
We're strangers in the dark tonight  
Blind hope (and)  
We don't ask why  
From the dark into the light
