

I Know U Know

[Tatiana Owens](#)

I can see you got an issue, you lost your man and now you wish you
Could turn back time, press rewind, start again make everything fine
Cause you see him happy with me now, happy with me now, you wish it was you now
Suddenly you wanna see him now all hours of the night and you're thinking that it's right[hook]
I know you know he's mine, so don't even try
Everywhere we are you're there I know you lost your mind
I know you know, I know you know, I know you know, I know you know, I know you know
I know you know he's mine, so don't even try
It's plain to see that he's with me I know you've lost your mind
I know you know, I know you know, I know you know, I know you know, I know you know Gotta problem with
limitations, can't restrain your dedication
To turn back time, ruin mine, start again, but that's not fine
Now you call him like you're crazy, like you're crazy, you must be crazy
Drunken moments forget he dates me, but you just saw us at the club and now you hate me[hook] Here you go
again talking shit like I give a shit
See you run around town, try to talk me down down
You catching a fit, got I got him you ain't with shit
Nobody's on you so you watching what I do[hook]
