

Girl Called Alex (Live from Spotify NYC)

Kurt Vile

In the dawn's early light
I recall a girl named alex
She and mark, they were happily wed
At least in my head I think about them all the time
I think about them all the time
Think about them all the time
Think about them all the time I wanna live all the time
In my fantasy infinity
There I will never be abandoned
There I'll have a handle against
Everything that will never happen to them
And me Hey that's what I say
I wanna, I wanna walk out into the night
Without it bein' runnin' away
From a bad day in my brain
For the sake of a strip that I could be cruisin'
In the comfort of a sportscar illusion I think about them all the time
I think about them all the time
Think about them all the time
Think about them all the time Hey that's what I say
