

To the Stars

Modestep

Now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally come When these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray... Now that you've gone to the stars
Now that the storm has finally come So now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally come When these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray... So now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally come Now that you've gone...
