Watching You

Marcapasos

She likes it better when you come in early
She doesn't like it when you stay out late
You hear the noise outside your window
She's dangerous make no mistake
So lock your doors and take a breath
Don't fall asleep prepar yourself
She's not all there, not all there
She's not all there, she's right there
Help me, help me somebody save me
I keep running she keeps on chasing
Reminds me all the time
No matter where you go I'll always be watching you
Help me, help me somebody save me
I keep running she keeps on chasing
Reminds me all the time, reminds me all the time
No matter where you go I'll always be watching you
This is the first time I let it show
I should have never got personal
The mood was set and the lights were on
What do you think could ever
I didn't know that she was normal when I caught her eye
But when she turned from Dr. Jekyl into Mrs. Hyde
And now her heart beats for me, blood runs colder
Heart beats for me, blood runs colder
Help me, help me somebody save me
I keep running she keeps on chasing

Reminds me all the time, reminds me all the time
No matter where you go I'll always be watching you
Help me, help me somebody save me
I keep running she keeps on chasing
Reminds me all the time
No matter where you go I'll always be watching you
Watching you [X8]
One, two, she's watching you
Three, four, lock your door
Five, six, you're on her list
Seven, eight, it's way too late
Ohh ohh oh oh oh

Help me, help me somebody save me
I keep running she keeps on chasing
Reminds me all the time
No matter where you go I'll always be watching you
Help me, help me somebody save me
I keep running she keeps on chasing
Reminds me all the time
No matter where you go I'll always be watching you
Help me, Help me
(Always be watching you)
Save me, save me
(Always be watching you)
Help me, help me
(Always be watching you)
No matter where you go I'll always be watching you
