

Never Never Love

Simply Red

So now we've got our independence, ooh
What are we gonna do with it?
Learning to play different games
Already using different names 'Cause now our love bears no resemblance, ooh
To what we had before
When our love was good it was all that we saw
When our love was good it blinded us before
This real revolution, baby, where you're not below me anymore Never never love
Can never be enough
Never be enough
Just ain't good enough, yeah
Never never love
Can never be enough now
Never be enough, oh no So now we've got our independence, ooh
What are we gonna do with it?
Building the houses, claiming back the land
Burning the bridges, cleaning up your hands 'Cause now our love bears no resemblance, ooh
To what we had before
Now our love has something for the future
Now our love will grow the seeds to sow this real revolution
This good revolution, baby, where you're not below me anymore Never never love
Will never be enough
Could never be enough
Just ain't good enough, yeah
Never never love
Will never be enough
Never be enough, oh no no no When our love is good we have something for the future
Now our love will grow the seeds to sow this real revolution
This good revolution, baby, where you're not below me anymore Real revolution, yeah
Oh yeah, oh no no no no no
It's a real revolution
So good, oh no no no no no
Real revolution, yeah So real, this revolution now
Real revolution
So real, this revolution now, oh no no no
So real, so real, oh no no no
