

Young And In Love

Jordin Sparks

I didn't ask your opinion, whatcha talkin' 'bout?
Too quick to jump to conclusions, 'cause we're hangin' out
There ain't no wishes, ain't no fuss
When it's just you and me, you and me
What makes you think that you can know?
What's gonna stick, what's gonna blow?
So get 'em boy
Let them pull at the seams, don't they know what it means
To be young and in love like that?
Who are they to decide if it's wrong, if it's right?
To be young and in love like that
Like that, like that, like that, like that
To be young and in love
If people offerin' answers, sounds like breakin' glass
I can't remember the questions, whatever asked
It's a free road you came down
But you don't bother me, bother me
One of those days when we're old
I'll stop and say I told you so
So get 'em boy
Let them pull at the seams, don't they know what it means
To be young and in love like that?
Who are they to decide, if it's wrong, if it's right
To be young and in love like that?
Like that, like that, like that, like that
To be young and in love like that
Like that, like that, like that, like that
To be young and in love
It don't matter what they say, too late to walk away
'Cause I need him, much too strong
I've waited for so long to feel all the things that I feel
So I gotta get that boy
Let them pull at the seams, don't they know what it means
To be young and in love like that?
Who are they to decide, if it's wrong, if it's right
To be young and in love like that?
Like that, like that, like that, like that
To be young and in love like that
Like that, like that, like that, like that

To be young and in love
