

My Little Phoenix

Tarja

Gracefully she's circling higher
She has the wind beneath her wings
And looks down on us, she said Robbed of my innocence
Had no more time to play
I sure got my feathers burned
But I'm stronger than the flames Here she comes, here she comes
I've been waiting for so long
Here she comes, rose again from the flames
My little phoenix Eternity is set in her eyes
Throwing sparks back at the world
That'll never die and I think She was robbed of her innocence
Had no more time to play
She's only a little girl
But she's stronger than the flames Here she comes, here she comes
I've been waiting for so long
Here she comes, rose again from the flames
My little phoenix Here she comes, I've been waiting
For my little phoenix You've got to get close to the flame
To see what it's made of
You've got to get close to the flame
To see what you are made of Here she comes, here she comes
I've been waiting for so long
Here she comes, rose again from the flames
My little phoenix
