

# Dream the Night Away

## Cheap Trick

It's 5 o'clock, I think I'll find my way downtown  
I try to turn my mind off, but I don't know how Let me dream the night, dream the night away  
Don't make me dream the night, dream the night away How can I help but hate the way I feel?  
Make sense of memories that won't make them real? Whoa! Dream the night, dream the night away  
Dream the night, dream the night away Sometimes the love you make can break your heart  
Just when it seems so easy, then it all falls apart (guitar solo) I feel so helpless when I think of you  
I never said those things I thought you knew Hey! Dream the night, dream the night away  
Dream the night, dream the night away (You got to dream the night) Dream the night, dream the night away  
Dream the night, dream the night away (Yeah, yeah, yeah, yeah)
