

# Lady of Magic

## Maze

She came along when I was down  
thru thick and thin she's been around And Ooh I'm really glad i've found my lady, my lady Of Magic she's got  
so much magic.  
(She's so good)

so much love and magic... Whenever I need her she's there

It doesn't matter when or where She always shows me that she cares, My lady my lady of Magic...  
(She's got so much magic) She's so good (so much love and Magic) There's not a thing, oooh that she can't do,  
boy she's proven time and time and time before... (the woman's got magic magic) And I think she's special. In so  
many many many ways, I'll be her friend forever more. She Always knows when something's wrong, her smile  
just helps me move along, To her I dedicate this song, to my lady, my sweet lady, Of Magic  
(She's got so much magic, so much love and magic) (That's my baby)

She's got so much magic so much love and magic  
(That's my baby, and she's fine) She's got so much magic, so much love and magic (repeat til end) (The woman's  
got magic my lady's got magic)

That's my girl that's my girl...
