

# Leave the World

## Blutengel

You lay on your bed this night  
Your eyes stir on the walls  
There's no one beside you anymore  
And you feel aloneA candle burns in your room  
Rains keeps falling on your past  
No hope for a better life  
And you feel paralyzedA black tear falls from your eyes  
You hold the razor blade in your hand  
One cut to end it all  
You want to die tonightOn bloody wings you can fly  
No one can hold you back anymore  
You're on your way to eternal silence  
No one can hurt you thereYou want to escape from this life  
You want to hide yourself tonight  
From the darkness of your dreams  
You just want to leave the world
