Framed In Poor Light

Choke

step back, this drop in position
is hitting hard
deadline, this week's lost its meaning
been going on for a while
push hard, focus inconsistent
regresss to start
shift this phrase
just to take this weight
from my armsrejected stability from the startsetting up again
try to ensure progression's kept
shift this phase
just to take this weight
from my armspushing on
and it feels like sunday
it's not worth forcing
just go with itlosing days, freezing this time
all i know is that pressure remainskeeps me up
'till i can't read what's real
afraid that i've
framed up this shot
in poor light
throw me up
and spit me out to fate
seems like i've been
pulled throough this mud
a few times
