

Memories

We Came As Romans

So this is where it ends, the road we took together (together, together)
Turn another page, however and forever (forever, forever)
We only got one chance, the seconds are fading
Under the moonlight, we're wishing the same thing
I wanna remember, remember this moment
Remember this moment, remember this moment Tonight, I'm thinking it's time
To burn it all down before the rest of our lives
And it can't last, so never look back
Give me your heart and I will give you my hand 'Cause nothing's stopping you and me
From making all these memories
'Cause nothing's stopping you and me
From making all these memories Another line begins, I wonder what comes after
We will be the same, or be in different chapters
We only got one chance before it's all over
Under the moonlight I want you to hold on
We're gonna remember, remember this moment
Remember this moment, remember this moment Tonight, I'm thinking it's time
To burn it all down before the rest of our lives
And it can't last, so never look back
Give me your heart and I will give you my hand 'Cause nothing's stopping you and me
From making all these memories
'Cause nothing's stopping you and me
From making all these memories This is it, we're never getting that back
I'll admit I'll always become partly hers
(One last night to remember)
This is it, we're never getting that back
I'll admit I'll always become partly hers
(Let's take this world together, now) Tonight, I'm thinking it's time
To burn it all down before the rest of our lives
And it can't last, so never look back
Give me your heart and I will give you my hand 'Cause nothing's stopping you and me
From making all these memories
'Cause nothing's stopping you and me
From making all these memories 'Cause nothing's stopping you and me (one last night to remember)
'Cause nothing's stopping you and me (let's take this world together)
