

# Big City Dreams

## Never Shout Never

You say we're both little people and you like it that way  
But in time I'm gonna put this body to shame (and grow old)  
Wear a suit like my old man  
Pack up all my things and get my ass out of town We've got it good  
Whether you like this town or not  
I know it's small but with a big head  
It's bound to get hot  
In the summer  
But the summer is a bummer  
If you can't leave  
This pathetic excuse for a town That holds all your memories  
A lifetime of crushes and your broken dreams  
To be anywhere but here  
But baby anywhere is away from me If you got it all figured out  
Then what is there to shout about  
This midwest town is gonna miss you  
Just go ahead and work it out  
But first come on and let it out  
Scream it shout it tell everybody that you're gonna leave In about one year you'll have it all figured out  
These big city dreams are what you're about  
Walking like strangers among these states  
Only time will tell how long I can wait We've got it good  
Whether you like this town or not  
I know it's small but with a big head  
It's bound to get hot  
In the summer  
But the summer is a bummer  
If you can't leave  
This pathetic excuse for a town That holds all your memories  
A lifetime of crushes and your broken dreams  
To be anywhere but here  
But baby anywhere is away from me If you got it all figured out  
Then what is there to shout about  
This midwest town is gonna miss you  
Just go ahead and work it out  
But first come on and let it out  
Scream it, shout it tell everybody that your gonna leave Me again oh so casually  
Would you take the hit for me or the whole team? If you got it all figured out  
Then what is there to shout about

This midwest town is gonna miss you
