

Last This Day

Faithless

Lines to the skin
They're the same neither sun nor sand
Tubes to the mouth
Cannot laugh or sigh or even cry
A drop in the ocean, a second and all time
One stop in the endless sky
But you mean the whole world to me
You're an island of light
So please last this day, stay one more day
Please last this day, stay one more day
Stay one more, stay one more, stay one more day
Just one more, just one more, just one more day
All this madness around us
You are knowing and so still
You were made in love
Grew in hope, were born in pain
You left them running 'round
Trying to make you breath again
One tiny link in an endless chain
But you mean the whole world to me
You're an island of light
So please last this day, stay one more day
Please last this day, stay one more day
Please last this day, stay one more day
Please last this day, stay one more day
