

Follow Me

Bottom Line

Got everything you want
Keep searching you're wondering
It's harder then you thought
Keep dreaming And don't ever change
Hide your mistakes
And don't ever lose direction
Your heart your passion And everything you've lost
Misplaced and replaced with
A touch of something wrong (who are you?) And don't ever change
Hide your mistakes
And don't ever lose direction
Your heart your passion By now we gotta find a better way
Some how there's gotta be a...
Take my hand, and follow me...
While you can!
And farther than I'll ever need
'Cause I'm that kind of ???
But never leave you're..... And every thing you have
A present reminder
For everything for everything, no!
Don't, don't ever change
Don't ever let yourself lose direction
Your heart your passion By now we gotta find a better way
Some how there's gotta be a...
Take my hand, and follow me...
While you can!
And farther than I'll ever need
Cause I'm that kind of ???
But never leave you're.....
