

# Dehydration

Bobby Myers

Faith is failing  
Thoughts come undone  
Every single cell inside my body goes  
Numb, just like it never did before  
Just like it never did  
My faith failing  
Where'd it come from?  
And every single cell inside my body is numb  
Shout to anyone in the dark  
Feel these words that create a spark  
'Cause there's a  
Fire that burns us  
And we can't live without water, water, water  
Face the flood 'cause it's going under  
And only those without wings will die  
People speak and sing and stand up  
But words aren't enough to fill my cup  
'Cause there's a  
Fire that burns us  
And we can't live without water, water, water, yea  
Face the flood 'cause it's going under  
And only those without wings will die  
Looking up, how I'd love to join them  
But I never learned to fly  
I never learned to fly  
(That's not the reason)  
That I have never tried  
(What you believe in)  
I guess it seemed so tired  
(What you believe in)  
Face your own flood  
Together we will  
Drown, just like we never did before  
Just like we never did  
Face the flood 'cause it's going under  
And only those without wings will die  
Looking up, how I'd love to join them  
But I never learned to fly
