Bottle Up Lightning

Country Crusaders

Look me up when you're back in town
You know the number, I'll be around
Doing what I do
Living my life as a Simple man
Being alright with where I am
But when it comes to you, when it comes to you
Wish I would have taken a few more chances
Spun you around the room a few more dances
Just for once slip past these fences
Follow your heart over that horizon
Never looking back, just keep on driving
But holding you is just like trying to
Bottle up lightning
There's one little voice on the silfor?? side
Just dying to tell you don't say goodbye
But I can't make you stay
You might stay a day or a couple weeks

Sooner or later you'll find your wings
And you just fly away
And you hear me say
Wish I would have taken a few more chances
Spun you around the room a few more dances
Just for once slip past these fences
Follow your heart over that horizon
Never looking back, just keep on driving
But holding you is just like trying to
Bottle up lightning
Wish I would have taken a few more chances
Spun you around the room a few more dances
Just for once slip past these fences
Follow your heart over that horizon
Never looking back, just keep on driving
But holding you is just like trying to
To bottle up lightning
To bottle up lightning
