

Miracle Machine

Blind Guardian

When they are coming give us guidance
For they are calling to erase the dam
Yet after all they praise the coming
To erase the dam
They will return (choir)
Now let me take you to the other side
Turn off the light and let it grow
They would set it on fire
They come to fool us all
They are slaves to the fire you know
The fire must grow
They have to feed it
We must believe in something
That I would call a miracle
The grail will break the final seal
We must believe in something, a miracle
A miracle machine, we just hide it secretly
No belief x2
No grief (whisper)
Give us what we need
Betrayed by the night
I've learned to love the shadows
And now they're coming (choir)
+ That's why I need you on the other side
And then we
We may carry another light
I summon from inside
Deeper inside
They don't belong
Yet though they claim they're right
Let it grow (choir)
Turn off the light let reason grow
They would set it on fire
They come to fool us all
They are slaves to the fire you know
The fire must grow
They have to feed it
We must believe in something
That I would call a miracle

The grail will break the final seal
We must believe in something, a miracle
A miracle machine, we just hide it secretly
For they are coming
Give us guidance
