

Tidal Wave

David Gray

Ever since your fingertips, ever since your eyes
Talking with the light on, bluer skies
Even if I wanted to, how can I explain?
Coming through my head now this tidal wave All your favorite eyelashes, all your bluest skin
Bring them and I'll meet you in that room again
Even if I told it true, how could they believe?
Coming through my head now this tidal wave, tidal wave Coming over waterloo, dreaming of your hands
Want to run away now to foreign lands
Even as I lie with you, listen to your breathe
Coming through my head yeah this tidal wave, tidal wave, tidal wave
