

The World Is Darker

Neverending White Lights

You long to see the world die
I long to keep this cure inside
Every violent whisper, every crash
Pounding in my heart Love can save a thousand lives
Joy in a world that sweetly cries
For every violent moment it has become
The cure will come, thy will be done Well its only lonely soul I'm after
The heart is dark but the world is darker Watch your back if your heart is weeping
Watch your heart if you back is bleeding
